Resources

Women’s Economic Opportunity Index 2012
In the second half of the 20th century, the entry of women into the workforce helped to propel most of the world’s developed economies. But women remain the world’s greatest pool of untapped labour. Nearly one-half of the world’s working age women are not currently active in the global economy.

Preventing Unintended Pregnancies and HIV
The dramatic expansion of HIV prevention and treatment services has significantly reduced the incidence of HIV among children and improved maternal health.

The Global Gender Gap Report 2011
These rankings are designed to create greater awareness among a global audience of the challenges posed by gender gaps and the opportunities created by reducing them.

The Effect of Women’s Economic Power in Latin America and the Caribbean
This report explores how women have played a critical role in achieving the poverty declines of the last decade, with their labor market participation rates growing 15 percent from 2000 to 2010.
